Colour By Number Pixel Puzzle Picture: Christmas Robot 1

Pictures can be stored in a computer as a grid of numbers. Each number gives the colour of that small area or pixel. This is also the way digital images are stored and represented on a screen.

Recreate the picture by colouring each pixel as given by its number. Look up the colour for each number in the key. For example, colour pixels marked 0 in black, and pixels marked 1 in red.

Why not create your own Christmas pixel puzzle picture?
