Computing Event Invitation

“I found the seminar at Roehampton University exceedingly beneficial and interesting. Tig’s talk, in particular, has been a great catalyst for broaching the subject of AI at my own school.” **Nicholas Morrell**, Deputy Head (Academic), Westminster Cathedral Choir School

“Thank you so much... These events are superbly organised and I’m so grateful to get the invitations. Here at Highwood, we’re looking to write our own computing curriculum...and the last talk I went to that you organised had some really, incredibly minded individuals that blew me away!” **Serraphina Robinson**, Principal, Highwood Copse School

Hello from [ICT for Education](#).

Join fellow Computing and Computer Science teachers and school leaders at the [ICT for Education seminar being held at Queen Mary University London \(QMUL\)](#) on Tuesday 23rd April.

Raise the profile of Computer Science at your school and increase interest in this key subject. Promote computer literacy and make learning digital skills fun whilst providing exciting career opportunities for students and preparing them for the future.

Hear what AI can do for you as a teacher, saving time and making lesson planning easier. Increase your confidence in your ability to deliver innovative compelling and relevant subject content.

Hear how others are making Computer Science and technology a standout feature of their school curriculum that enhances their school’s reputation, motivates staff and provides important links to the wider community.

ICT for Education seminars are for those teaching in primary, secondary, independent, special and FE with a passion for Computing, Computer Science, Technology, and with a commitment to raising the standards of computer literacy and the appreciation of technology among students.

Paul Curzon, Professor of Computer Science at QMUL, **Miles Berry**, Professor of Computing Education at the University of Roehampton, and **Tig Williams**, CAS Master Teacher, teacher trainer and IT professional, will be presenting content to help you in your teaching of Computer Science.

Come and hear keynotes on: Computer Science for Fun; how to encourage pupil engagement in Computer Science; the use of generative AI in the classroom. There will be pointers towards practical tools and resources available for teachers to inspire and motivate students and add pizzazz to the Computing curriculum.

Meet and spend quality time our speakers and with other delegates to learn and share ideas.

Our QMUL seminar is sponsored by **ASUS**. They will have their latest technologies on display and will be offering their best deals available to schools.

EVENT DETAILS

When: Tuesday 23 April 2024

Where: [QMUL Mile End Campus](#) in the [Geography building](#). **Room:** [geography 2.26](#) See map on website for details.

What time: Registration is from 15:30. Sessions start at 16:30. Seminar ends at 18:30, with post-seminar 'networking' available until 19:00. Don't worry if you are running late, or don't finish school until after sessions start! **Delegates are welcome to attend as and when their schedule permits.**

Cost: Nothing at all - and refreshments are included.

Please [REGISTER HERE](#).

Best wishes,
Ian.
